

## DATASHEET

### AD1000x10

Plug-in module EV/VE/DD1000 (10-pack)

#### MAIN FEATURES

- Plug-in module EV/VE/DD1000 (10-pack)

#### TECHNICAL SPECIFICATIONS

##### Power supply

|                     |                                                                                                                                                                                |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Operating voltage   | 9 to 24 VDC (12 V nominal)                                                                                                                                                     |
| Current consumption | 200 mA (Max. current capacity output day/night)200 mA (Max. current capacity output walk test)900 µA @ 13.4 VDC (Maximum)400 µA @ 13.4 VDC (Minimum)approx. 75 µA (Out of bus) |
| IADS-bus voltage    | 12 or 24 VDC                                                                                                                                                                   |

##### Other characteristics

|                        |                |
|------------------------|----------------|
| Accessory group        | Motion sensors |
| Type                   | Module         |
| Device type / Category | T3 / PIR       |
| Address range          | 0 to 31        |
