

## DATASHEET

### AD600

Plug-in module DD600

#### MAIN FEATURES

- Plug-in module DD600

#### TECHNICAL SPECIFICATIONS

##### Power supply

|                     |                                                                                                                                                          |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Operating voltage   | 9 to 24 VDC                                                                                                                                              |
| Current consumption | 200 mA (Max. capacity output day/night)200 mA (Max. capacity output walk test)900 µA (Max. @ 13.4 VDC)400 µA (Min.   13.4 VDC)Approx. 75 µA (Out of bus) |
| IADS-bus voltage    | 12 or 24 VDC                                                                                                                                             |

##### Other characteristics

|                        |                |
|------------------------|----------------|
| Accessory group        | Motion sensors |
| Type                   | Module         |
| Address range          | 0 to 31        |
| Device type / Category | T3 / PIR       |
