FP-PML-40B

Per-meter activation license applicable to FP115040U and FP115040H Sensor Unit when used in buried fiber applications for perimeter

MAIN FEATURES

- Per-meter activation license applicable to FP115040U and FP115040H Sensor Unit when used in buried fiber applications for perimeter
- pipeline TPI
- or data conduit TPI. The number of meters licensed needs to cover all cable beyond the initial lead-in section (max 500 meters) including all service loops
- isolation loops
- gate bypasses
- etc. Initial lead-in in excess of 500 meters needs to be added to the licensed section. Each meter licensed activates both sensor channels. Subject to internal technical review.
