

DATASHEET

GS615

Shock sensor analyser with EOL resistors and manual reset option

MAIN FEATURES

- Shock sensor analyser with EOL resistors and manual reset option

TECHNICAL SPECIFICATIONS

Power supply

Operating voltage	10-15 VDC
Current consumption	10 mA (quiescent) 50 mA (alarm)

Inputs / outputs

Alarm contact	12 VDC, 1 A
Wired-wireless	Wired

Environmental characteristics

Operating temperature	-40 to +50°C
-----------------------	--------------

Other characteristics

Product type	Shock sensor analyser
Tamper switch	Yes
